ABSTRACT :

Engineering education and technology go hand in hand, because every educational institution applies technologies in its teaching and learning process, such as using media computer technology. Educational institutions at the primary level is at the stage of the introducing their pupils to technologies, but many elementary schools have the same problem: how to provide understanding and a good understanding of the students with the media so that the application of computer technology in education technology, elementary schools run by well. The writer tried to solve these problems by creating learning applications by using Turbo Pascal 7.0.
